

7 October 2021

Boil tap water before use until further notice

Your water supply may be contaminated by bacteria that can cause harm to health

Water should be brought to the boil, then allowed to cool. It can be kept in the fridge, but should be covered and used within 24 hours

Boil all water used for cooking, drinking and food preparation

Use boiled water for cleaning teeth

Water for your pets should be boiled

Tap water **CAN** be used for washing, showering, bathing and washing clothes

Water **CAN** be used for toilet flushing

We are working hard to restore a normal water supply to all affected customers. You will be informed when your water supply is back to normal.
