## 2 WaterSure Tariff

### When the tariff is valid

If granted, the financial support will begin from the start of the billing period during which your application is received (i.e. the previous meter reading). This support will not run on automatically year on year. In order for it to continue we will require a new declaration to be completed at the start of each billing year confirming your circumstances have not changed. If this declaration is not completed, or returned, our charges will revert to the normal basis with effect from the start of the billing year.

### Restrictions

If you use water for discretionary purposes (e.g. for a swimming pool or garden watering using a sprinkler or unattended device) you will not be eligible for financial support.

### Checks

Your application for this tariff will be checked to ensure you properly meet the eligibility criteria. If there is any doubt the information supplied will be checked with Job Centre Plus or your medical practitioner.

If you apply for protection under the medical condition criteria for which you are receiving treatment, you will have to provide sufficient information to demonstrate that the condition does require “significant extra use” of water.

We will check to determine whether there is “significant extra use”. As a quality assurance on our vetting procedures we do, as a matter of policy, carry out random checks on five per cent of all applications for this tariff.
