

### Board assurance of charges for 2023-24

In approving the 2023-24 SES Water Schemes of Charges, the Board has considered:

#### 1. Internal assurance

- 1.1. The information presented to the Board on the charge setting process and expected outcome on future charges at the Board meetings held on 24 September 2022, 25 November 2022 and 10 January 2023. This included the Company's view on how the proposed charges meet all legal and regulatory obligations.
- 1.2. The change in wholesale and retail charges for a range of different customer types as presented by the Company, with an increase in charges of c14.4% primarily due to the impact of higher inflation and inclusion of revenue under-recovered in 2021-22 leading to an increase in the Company's allowed revenue for 2023-24 as compared to current year.
- 1.3. The effects of the 2023-24 charges on customers' bills for a range of different customer types. A handling plan is in place to communicate the change with stakeholders and provide financial support to those who need it.
- 1.4. The Company's systems and processes for documenting the Company's forecast data on customer numbers by type and consumption volume and the models that calculate the charges based on the collated input data.

#### 2. External assurance

- 2.1 The report from the external provider of independent assurance of charges for 2023-24 regarding the Company's compliance with the required procedures for determining charges contained in Ofwat's charging rules.

#### 3. External engagement

- 3.1 The Company has communicated with Consumer Council for Water (CCW) on a timely basis about the upcoming changes in its charges and is always open to discussion or response to any relevant query from customers or other stakeholders.

Based on the engagement described above, the Board is able to confirm that:

- The Company has complied with its legal obligations (including competition law) and Ofwat's relevant charging rules.
- The Company has the appropriate systems and processes in place for documenting the Company's forecast data on customer numbers by type and consumption volume and the models that calculate the charges based on the collated input data.
- The Company has consulted the CCW in a timely and effective manner on its charges and has provided early information to CCW and Ofwat on expected bill increases.
- The report from the external provider of independent assurance of charges for 2023-24, which highlighted no issues or concerns with the procedures followed by the Company and the resulting charges.

## SES Water

---

- The Company has assessed the effect of the charges that will apply from April 2023 on a range of different customer types. Given the increases in charges from prior year are above 5%, a Statement of Significant Changes is published alongside the final charges.

Signed on behalf of the Board of Directors, 13 January 2023.
